PROFESSIONAL SUMMARY

Electronics Engineering candidate completing degree requirements in 2026 with 240 hours of hands-on technical support training in equipment configuration, testing, troubleshooting, low-voltage wiring, access control, biometric devices, CCTV and video systems, and device integration. Experienced in working with technical hardware and software systems and performing diagnostics, testing, documentation, and basic networking tasks. Seeking an entry-level opportunity in electronics, equipment engineering, testing, maintenance, semiconductor manufacturing, or technical support.

CORE SKILLS

Access Control & Biometrics | CCTV & Video Management | Low-Voltage Wiring | Hardware Installation | System Configuration & Testing | Basic Networking & Command-Line Tools | Technical Documentation | Customer Support | Time Management & Teamwork

EXPERIENCE

Technical Support Intern | MTECH Biometrics Ltd. Corporation Jun 3 - Jul 30, 2026 | 240 hours

- Configured, calibrated, and tested access-control and biometric terminals, including AC-1100, Ubio-X Face, Ubio-X Pro, and Nitgen Fingkey Access devices.
- Installed and verified low-voltage wiring for door, elevator, boom-barrier, and turnstile access systems; supported equipment setup for client demonstrations.
- Configured CCTV/video platforms, visitor management, face recognition, and license-plate recognition tools using Ubio Alpeta, AxxionSoft, and Milestone VMS.
- Performed system diagnostics, workstation maintenance, device integration, log verification, and technical documentation while following safety and confidentiality requirements.

Customer Service Representative | Telepro Limited Corp. Jan 2024 - Feb 2025

- Resolved customer inquiries through phone and chat while maintaining accuracy, professionalism, and service quality during high-volume interactions.

Part-Time / On-Call Delivery Rider | Foodpanda Philippines Jan 2021 - Present

- Manage delivery schedules independently, completing orders reliably while handling routes, timing, and customer concerns.

Service Crew / Production / Maintenance | McDonald's Biñan Highway Feb 2019 - Feb 2022; Aug 2022 - May 2023

- Supported service, production, transactions, and routine maintenance while adapting quickly to shifting operational priorities in a fast-paced environment.

ENGINEERING PROJECT

Smart Roadside Drainage with Integrated Debris Storage and Sensor-Based Monitoring System

- Developed an ESP32-based monitoring system for debris accumulation and overflow detection.
- Integrated ultrasonic and float sensors with status indicators and monitoring functions.
- Performed sensor calibration, hardware testing, troubleshooting, and system integration.
- Worked with embedded electronics, low-voltage circuits, sensors, and wireless communication.

EDUCATION & TRAINING

Bachelor of Science in Electronics Engineering | AMA Computer College -Biñan Campus Expected Graduation 2026

Electrical Installation and Maintenance Training | Santa Rosa Manpower Training Center | Completed 2024

Additional Certificates | SMART Technopreneurship 101; English for Business and Entrepreneurship | Sep 2025
